

WE MAKE IT

Since the release of our first kayak in 2000 we've been focused on refining the look performance, build quality, features and fittings of our kayaks to ensure maximum fun out on the water. From easy to use Sit-On-Tops to lightweight inflatables, our 2016 collection has something to suit every skill level and style of paddling. With a unique aesthetic and a blend of performance together with reassuring stability we're confident you'll find the right boat for you in the pages that follow.

Proudly MADE IN FRANCE, BIC Kayaks are environmentally-friendly, using energy-efficient and non-polluting manufacturing techniques. All cut-offs are recycled back into the production process, as is the entire kayak itself at the end of its useful life.

To help you choose the right boat for you our kayaks are organized according to their intended use. The range names; BEACH, SPORT, PERFORMANCE and LEISURE will help guide you through our full collection.

New for 2016 is the JAVA, a close cousin to the recently released BORNEO and featuring the same innovative transportation system and extensive range of options. This 13'5" single-seater features the new removable wheel transport system, our unique tri-hull design for a stable ride and reliable tracking, built-in adjustable foot pegs, safety lines with multiple attachment points and integral rudder inserts. The fishing version takes these features one step further with storage hatches and rod holders.

In the inflatable kayak range we offer both entry-level and performance models. The YAKKAir Lite and Kalyma are well equipped and easy to paddle at a great price for beachside fun. A bit more serious are the Nomad and YAKKAir HP boats, featuring high-pressure technology for a more rigid hull and higher performance for longer distance trips.

To compliment our full range of kayaks we offer an extensive range of accessories and paddles to help maximize your fun on the water.

Whatever style of paddling and gear you choose, we wish you an action-filled season on the water. See you out there!

DESIGN & TECHNOLOGY

As a leading specialist in board and water sports, we've designed a range of high-performance, aesthetically pleasing kayaks that are as durable as they are innovative: imaginative hull designs, fast and stable ride, thermoformed polyethylene construction produced in France, ergonomically designed cockpits and seats, top quality fittings and fixtures, every possible care has been taken to ensure you get maximum pleasure from your time on the water. Various BIC Sport kayaks have been recognised with awards from the influential «Observateur du Design» magazine for their overall design, innovative features, and the environmental considerations behind their manufacturing/construction technology.

SUPER SOLID BUILD QUALITY

TST - Twin Sheet Technology :

The exclusive Twin Sheet technology used in the construction of BIC Sport kayaks is achieved by using thermoformed Polyethylene sheets. The deck and hull sections are formed and sealed together in one single operation. The result of this fusion is incredibly durable, unique in kayak manufacture. The join line is invisible and 100% secure. This process, creating a product that is lighter, stronger and smoother finished than rotomoulding, is also anti-UV treated. Highly resistant to knocks and scratching, it gives all BIC Sport kayaks exceptional durability.

HIGH PERFORMANCE HULL DESIGN

The THD (Triple Hull Design) shape was conceived to provide excellent glide and to give great manoeuvrability, while retaining maximum stability. The special shape of our hulls was inspired by trimaran construction, and features a large central section (1) with narrow water channels to optimise glide, and two outer hull sections (2) that give the boat stability without slowing its forward speed. The two resultant concave sections (3) help improve the overall performance.

ERGONOMIC SEATING

The seat ergonomics of the entire BIC Sport kayak range have been specially developed to ensure optimum paddle comfort.

- Flat back rest inclined towards the rear at the bottom to prevent the pelvis from being pushed forwards. This also relaxes the legs, relieving pressure against the foot rests.
- Centre of gravity set low down for improved stability, but above the flotation line so that the bottom of the seats stays dry.

QUALITY FITTINGS AND FEATURES

All the integral production fittings of BIC Sport kayaks are top quality to guarantee durability and paddle comfort

- Foam seat pads = improved paddle comfort
- Rubber-coated front and rear carry handles = easy carrying on land
- Protective rear bumper = protection from knocks and easy launching
- Removable rear trolley wheels (Java/Borneo) or casters (Bilbao and Tobago) = easier transportation on land
- Life lines = easy to climb back on board
- Elasticated straps = simple, secure storage for bags and water bottles
- Storage net = stores your essential equipment within easy reach

Removable rear trolley wheels (Java/Borneo)

Sit-On-Top for Everyone

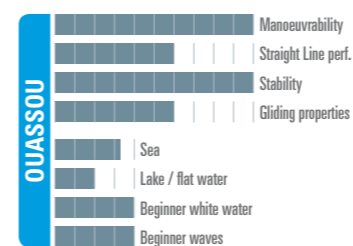

Stable, designed to be simple and affordable, the BEACH series kayaks are the gateway kayaks for our Sit-On-Top range, the easiest way to get out and have fun on the water while you're at the beach. They are made to BIC Sport's usual high standards, and their deck and cockpit design make them easy to use and very well suited to family and group activities. The Trinidad and Kalao models can be fitted with a small motor.

OUASSOU* The Ouassou is designed as a versatile and manoeuvrable kayak ideal for beach fun. The stern handles let you hang on to body drag and allow easy access on board. The Ouassou also handles surf and waves comfortably due to the 'spatula' shaped hull and the three hull inserts, enabling a set of fins (available separately as an accessory) to be fitted for better tracking. Its compact form and light weight make this a kayak that is easy to manoeuvre, transport and store.

TRINIDAD* The Trinidad is a kayak purpose-built for leisure : compact, able to seat two adults and a child, it's highly versatile and stable, making it suitable for all kinds of situations. For family outings, its ergonomic seats and stability are reassuring. For more serious paddling and exploring, solo or two-up, its very low draught, innovative hull design and wide rear storage area are really useful for getting where you want wherever that is, with whatever equipment you need to take, and for going further, faster. As a final bonus, the Trinidad can be fitted with a small electric motor to give it even more possibilities.

KALAO* The Kalao is quite the 4x4 of the kayak world. It is equally at ease on the sea, rivers or simply having fun on any stretch of water. The largely flat hull design with very little water draught is very stable and enables the kayak to go almost anywhere. It makes it simple for a family of two adults and two children to all ride together in complete comfort and safety. This is also a true 3 (adult) person Sit-On-Top, with 3 proper ergonomic seats and a wide rear storage area. Two other advantages of the Kalao : it's unsinkable, and it can be adapted to take a small electric motor.

Easy Glider

The kayaks in the SPORT range are already best sellers. The Bilbao and Tobago kayaks have helped create the BIC reputation in the kayak market with their combination of innovation in design, quality fittings, and a near-perfect stability/performance ratio. Compact and superbly finished, they are excellent kayaks giving great glide and superb handling for your most ambitious excursions and outings.

BILBAO * The BIC Sport Bilbao is a versatile kayak that will suit beginners and experienced kayakers alike. Whether you're paddling for sport, exploring, diving or having a quick paddle with the kids, the quality of its design makes all activities possible with comfort and ease. The fluid hull shape provides a nice smooth ride, while the deck shape and quality extras allow you to carry almost any load with optimum stability and guaranteed safety. Its size and reduced weight make it easy to stow and transport.

TOBAGO * The Tobago is the perfect kayak for family outings and general use. It offers several possibilities: 1 or 2-adult paddling, with 1 or 2 children seated on the central section, shaped like a motorbike seat. There is also space for a bag or container when out on an excursion. The fluid hull lines mean it's also well suited to sport kayaking, all in complete comfort and safety. The Tobago comes with a wheel at the rear, for easy transport in car parks, bow protection and elastic straps to secure your equipment. EVA foam pads cover the seats. The Tobago is a fast, stable and comfortable sea kayak.

JAVA The adventurer

The new Java is a single-seat Sit-on-Top kayak that stands out from the rest thanks to its excellent handling in any type of water, its capacity for carrying substantial loads, and its integral roller system. The Java also benefits from top quality fittings, such as its built-in adjustable foot rests, and its integral rudder inserts. It's a high-performance exploration and touring kayak, combining stability and comfort to help you go further, faster.

KEY FEATURES :

- Ergonomic cockpit = increased paddle-comfort.
- Vast rear storage area = can carry sizeable load of equipment for long trips or fishing.
- Wide, deep, triple-volume hull design = excellent steering control, great performance in sea conditions, glide.
- Integral roller system using removable wheels that are stored under the rear deck when on the water = easy transportation to the water edge without needing a trolley.
- Built-in adjustable foot rests = wide range of paddle position settings, paddle comfort.
- Design-led concept = aesthetically pleasing, great ergonomics.
- Integral rear protection runner and front bumper = longevity.
- Fishing Version fitted with integral rod racks/rests, watertight storage hatches, bait box holder... = totally adapted to meet your fishing trip needs.
- Three versions available : Standard, Touring (same colour as Standard but fitted out for Fishing), and Fishing (camouflage green/beige colour scheme).

BORNEO 100% mono/duo convertible for family fun

The Borneo kayak is a two-paddle family kayak that features some outstanding innovations. There's nothing else to rival it in the Sit-on-Top market and the Borneo has a range of attractive, original features specifically designed for the «leisure» paddling market.

KEY FEATURES :

- Carries 2 adults, 1 child, plus baggage.
- Adaptable for solo paddling with the same paddle-comfort as the duo set-up.
- An effective transportation system for the beach has been incorporated in the kayak's design. Removable wide-tyre wheels sit on an axle mounted on the kayak's keel. Once at the water the wheels are removed and stored in a special hatch on the rear baggage area.
- Its generously-proportioned, «triple-volume» hull design gives the kayak a combination of excellent glide and re-assuring stability.
- The large rear section incorporates a capacious baggage-carrying area.
- As with all BIC Sport kayaks, the Borneo's shape and concept has come from a specialist designer.
- The Borneo is also available as a specialist «fishing» version, and includes a number of factory-fitted extra features (rod racks and rests, watertight storage hatches...)
- The extra features on the fishing version are available as individual accessories to fit to a standard Borneo.

Land use configuration
Wheels mounted on their axle

Water use configuration
Wheels stowed in their storage hatch

1. Mono-paddle seating configuration
2. Duo-paddle seating configuration
3. Storage space with integral elasticated straps
4. Wheel storage hatch
5. Foot rest
6. Rear bumper

Highly stable triple-volume hull design
= Total safety for family
and/or fishing excursions

Further, Faster

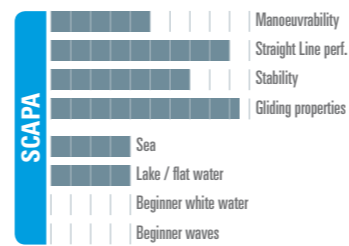

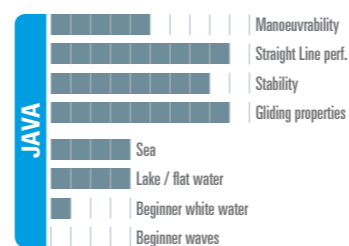

Much longer than our other boats, the two models in the PERFORMANCE series are aimed at a more sporty market, offering a wider range of paddling styles and options, but still easy to use. Joining the Scapa and the Borneo, the new Java model arrives with a fistful of innovations.

JAVA New for 2016, the Java features above all an excellent glide/stability ratio, it's a high performance sea-going single-seater, longer than the Bilbao to allow you to take on even more ambitious outings and trips. Combining an innovative hull and a neat design, it also gives you equally high quality features : a wide, flat rear storage area for carrying sizeable loads, integral wheels/rollers for easy transportation, plus a moulded deck insert for storing the wheels/rollers while sailing, all conceived to help you get in and out of the water with the minimum of effort. It also includes excellent and comprehensive extra equipment enabling you to customise your boat for fishing trips and excursions.

BORNEO The Borneo is a brand new family oriented double Sit-On-Top, with a number of innovative features, notably the possibility of solo use in equal paddling comfort to double. Its fluid hull lines give it great glide whilst retaining reassuringly comfortable stability. There's innovation in the equipment and fittings too, like the removable integral wheels/rollers for easy transportation. There's a molded deck insert for storing the wheels/rollers while sailing. Clearly a future benchmark boat in its category.

SCAPA * With its narrow, water-cutting bow section and clean hull shape, the Scapa is a boat that is designed for speed. The look matches the feel in every way but still retains the excellent stability and added safety and comfort you expect from a BIC 'Sit-On-Top'. Fast but stable, it's an excellent boat for fast cruising, physical conditioning and ideal for learning sea kayaking. The molded baggage storage area behind the cockpit allows you to load up with diving tanks, as well as fishing or touring equipment.

Fun and Fashion

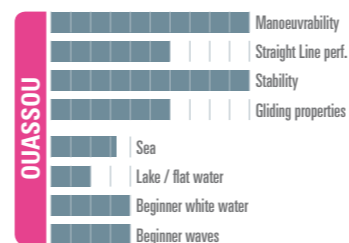

In 2016, BIC Kayaks will be freshening-up its range of classic kayaks visually, going with the current flow for acid colours. The Ouassou, Bilbao and Tobago will be available in a superb acid-green as part of the new FASHION range, very different from the usual colourways. A special edition that you can enjoy alone, together or with the family, and stand out from the crowd on the water !

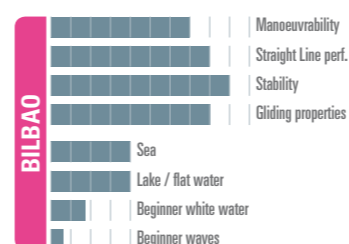

OUASSOU * The Ouassou is designed as a versatile and manoeuvrable kayak ideal for beach fun. The stern handles let you hang on to body drag and allow easy access on board. The Ouassou also handles surf and waves comfortably due to the 'spatula' shaped hull and the three hull inserts, enabling a set of fins (available separately as an accessory) to be fitted for better tracking. Beach Sports

Kalyma

- 1- Heavy duty twin screw valve
- 2- Nylon skin with highly resistant PU coating
- 3- PVC bladders
- 4- Heavy duty abrasion-resistant supported «hull» skin

KALYMA The Kalyma is a family fun kayak for beach, open sea and rivers. Comfortable, tough, stable and light, it's packed full of practical fittings and features : removable seats that are also adjustable for leg length, integral water resistant storage compartment, an integral draining valve... The safety features include three independent inflatable sections, a removable rear fin and a guiding skeg. It can be used by 1 or 2 persons paddling in comfort and comes with a carry bag, air pressure gauge and a repair kit.

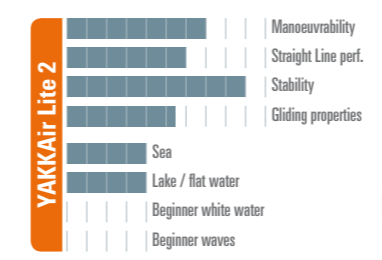

YAKKAir Lite

- 1. Cordura Polyester fabric
- 2. Reinforced PVC
- 3. Dacron tube
- 4. Polyurethane bladder
- 5. Multi-tube hull
- LP : Low pressure

YAKKAir Lite Developed directly from the successful YAKKAir HP, the YAKKAir Lite is aimed specifically at coastal paddling close to the beach, for rivers and for other inland waters. Stable, strong and light weight, the YAKKAir Lite is the ideal way to get out on the water on your holidays. Lites are inflatable but built to last : Polyurethane bladders + Dacron bladder sleeve, multi-tube bottom with a coated fabric outer skin giving exceptional durability. The rigid front and rear tip stiffeners help sharpen the cutting edge and further improve glide.

The **YAKKAir Lite 1** has been conceived for one person use. Stable, fast, light weight and comfortable, it's a fully-equipped kayak which comes equipped with backrest and footrest. The **YAKKAir Lite 2** has been designed for two person paddling, but can easily be used solo by mounting a single seat in the centre of the kayak. It's a fully-equipped kayak which comes equipped with backrests and footrests.

L: 13'5" / 4.10m
w: 37.8" / 0.96m
W: ±29.7lbs / ±13.5kg
Maxi load: 550lbs / 250kg
Capacity: 2 adults

The inflatable models in the Leisure range are designed for leisure paddling close to the beach or on lakes and rivers. Aimed at beginners and occasional paddlers, they're stable, sturdy and light weight and are well fitted for and suited to family fun. They pack down into a carry bag but can be unpacked and inflated in minutes.

High Pressure !

The principle behind these highly innovative inflatables lies in their use of multiple materials to help reduce weight, plus the use of a keel and bottom section inflated to high pressure to give the hull a superbly efficient V shape. Result : the YAKKAir HP and Nomad HP are light weight and high performance boats with the advantage of pack-down and storage into a compact carry bag. This means you can get to further flung and less accessible spots much more easily.

When you sit down in a YAKKAir HP or a Nomad HP, the high-pressure floor (1) presses down on the high-pressure keel (2) putting the PVC skin (3) under tension. Under the pressure of the water, the skin stretches and curves out to give the hull its high-performance double concave shape.

(HP) : High pressure (LP) : Low pressure

Keel + rigid high-pressure floor + fabric + water pressure = concave shape keel + rigid dry seat

YAKKAir HP The YAKKAir HP range is a true revolution in inflatable kayaks with the combination of a keel and a high-pressure inflatable hull/floor to maximise the V shape and with it the kayak's overall performance. YAKKAir HP kayaks are lighter, perform better and give a more comfortable ride than conventional inflatable kayaks. Wind drag/resistance is reduced and they are easier to steer at sea, giving them a performance equal to that of existing rigid designs. The YAKKAir HP1 & HP2 come equipped with backrests and footrests. YAKKAir HP kayaks can be fitted with flexible deck cover to keep splash water out, without any hindrance to movement or safety.

NOMAD HP The Nomad HPs use the same concept that was so successful on the YAKKAir HP, with a high pressure inflatable keel and bottom section of the hull, together creating a dynamic and high performance hull shape, all at a feather weight and giving an excellent paddle position. As for performance, the Nomad HP benefits from a higher bow section, extended length, and a flexible decking system giving better internal protection. With its innovative decking system, the Nomad HP3 is a true sea kayak, ideal for longer double paddling excursions, and featuring a large storage area for carrying equipment. It also makes it more viable for the more challenging conditions you find in cooler seasons. Take out the decking and the HP3 becomes a vast, stable, top-performing family 3-seater. The Nomad HP1 is a solo kayak with the same features as the HP3 (higher bow section, flexible decking...) giving you the same level of paddle-comfort and protection for more extended solo trips. The Nomad HP1 & HP3 come equipped with backrests and footrests.

		L: 10'9" / 3.30m w: 35.4" / 0.90m W: ±24.2lbs / ±11kg Maxi load: 242lbs / 110kg Capacity: 1 adult

Fishing in Total Freedom

BILBAO* With its very rounded hull shape and narrow tips, the Bilbao Fishing has great glide and excellent stability, guaranteeing you complete safety for your solo fishing trips. The intelligent deck design and quality fittings allow you to carry any kind of load. Its reduced length and weight make it easy to store and transport.

TRINIDAD* Compact but wide, the Trinidad Fishing is the kayak for double paddling. It's a highly stable boat, designed for solo or two-person fishing trips. It's got great storage possibilities for your fishing equipment. It can be fitted with the appropriate mountings to take a small electric motor.

JAVA New for 2016, the Java Fishing gives you above all an outstanding compromise between glide and stability. At more than 4 metres long, you can take on even more ambitious excursions than in the Bilbao. Its large rear storage area and integral roller system are great advantages for angling outings. Better still : comprehensive fittings and accessories giving you lots of options for personalising its set-up, for angling or other trips. The Java is also easily converted into a sea kayak.

BORNEO A brand new double-seater Sit-On-Top over 4 metres long and crammed with innovative features, the Borneo Fishing has great glide and is comfortably stable. The main innovation : you can switch between solo and double and keep exactly the same comfort of paddle position. A real plus for angling excursions. Its other major pluses : a sizeable flat rear storage area and an integral roller system. And it's very simple to convert to a sea kayak.

YAKKAir HP2 The YAKKAir HP2 Fishing is carried in a wheeled back-pack for easy transport, whether you're on foot or by car. It only takes a few minutes to set up and is ideal for reaching difficult fishing spots. Its high-pressure keel and high-pressure floor with their solid PVC skin form a highly-efficient V shape hull. Lighter but as powerful and comfortable as a rigid Sit-On-Top kayak, the YAKKAir HP2 Fishing can also be fitted with a protective canvas cover. It is made from sturdy material that will withstand potential damage from fishing hooks. The YAKKAir HP2 can also be used for solo kayaking, leaving lots of room for all your fishing gear.

Fishing range kayaks are fitted with rod racks and watertight hatches for carrying extra equipment.

The kayaks in the Fishing range enable you to get quickly and easily to the best spots, and to glide through shallows and rocky areas totally risk-free. Single or double-seaters, they set themselves apart from the rest with their beige or green camouflage colouring as well as by their angling-specific fittings (integral rod rests and racks, storage lockers...) giving you the freedom of hassle-free angling action.

Paddles

BIC Kayak's catalogue offers a wide range of kayak paddles, to give the best choice possible for every kayak pursuit and paddling style. Mini-ranges called «Beach» (leisure kayaking), «Sport» (all-round and sport kayak), «Sport Soft Grip» (integral foam grips), and «Adventure» (top quality materials, long distance paddling) will help guide you to the perfect paddle for you. The blades of our Sport and Adventure paddles have been custom designed to ensure maximum paddle comfort. The central rib stiffens the whole blade to help spread your effort and the water flow as efficiently as possible during the submerged phase. Making them exceptionally easy on your hands, comfortable to use, and delivering top performance.

Shaft: Aluminium				Aluminium			Aluminium + Soft Grip		100% Fiberglass		
Asymmetric blades for mainly fun kayaking and your first paddling adventures. Easy to use and not too physical with very little water runoff. Black anodized shaft, polypropylene blade.				Asymmetric blades for long distance courses and touring paddling. Moderate power, comfort in windy and choppy conditions. Black anodized shaft, fitted with anti - drip shields.			Asymmetric blades for long distance courses and touring paddling. Moderate power, comfort in windy and choppy conditions. Aluminium shaft covered with a soft and comfortable grip. Fitted with anti - drip shields.		Asymmetric blades for the more advanced kayakers. Very stable, light weight, powerful, it's ideal for taking you to another level, an excellent motor at a great price for the more demanding enthusiast.		

Backrests

BIC Sport's backrests improve the paddle comfort of BIC Sport kayak seats, and are absolutely indispensable for long distance paddling. Aside from the improved comfort, they also help increase your paddle power, keeping the back well positioned in the lumbar region. The Ergonomic backrest (see photo) is the best example of our expertise. Inspired by windsurf harness design, it's a rigid, moulded, ergonomic backrest giving exceptional back support, to help deliver maximum power with minimum fatigue. There's nothing else that can match it on the kayak market.

Power

Foam covered back rest, comfort and support for your back, easy adjustment.

Standard

Foam covered seat and back rest, comfort and support for your back, easy adjustment.

De luxe Fishing

Thick, ergonomic foam cushioning, rear pocket; 2 integral rod holders. Soft neoprene comfort.

Ergonomic

Backrest aimed for maximum comfort. Ultra-rigid and ergonomic, it gives superb back support for less fatigue and more paddling power. Material: pre-formed, articulated, thermoformed foam with a rigid inner plate.
